

Shoe Game

This game can be played with whatever equipment you have in your cupboard and forever evolves with your imagination for creating targets & obstacles.

How?

For this game your young people will need to take off their shoes. You will also need to sit them behind a 'throwing line'. If your young people are in teams then you can spread your teams around the edge of the room and have multiple throwing lines.

The aim of the game is your young people need to take turns throwing their shoes underarm at a target in order to score points for their team. The team / young person with the highest number of points is the winner.

Some examples of targets:

- Sit a bucket in the middle of the room, with some skittles around the edge of the bucket. 5 points for getting a shoe inside the bucket, -1 point for knocking over a skittle.
- Sit some footballs on cones - Knock a football off a cone = 1 point
- Draw a circle on the floor with chalk / masking tape. Any shoe that lands fully inside the circle scores 5 points. Any shoe which doesn't land inside the circle loses the team a point. You could have multiple circles with different scores attached.

These are just a few simple examples of targets / obstacles you can set up. To make the game more challenging, set up more obstacles which lose the teams points.

Remember, you can use your young peoples' imagination and get them to create the targets & obstacles before playing.

Equipment:

- Two shoes per person
- Any equipment you have in your cupboard.

Details:

Age - Juniors / Company

Time - 10 - 15 Minutes

Difficulty - 2/5
